To Whom It May Concern:

I oppose the Draft Memorandum, Docket No. 98N-1265, being proposed by the FDA. The compounds produced by specialized pharmacies has been a great help to me and many others who require specialized medications. Without them we would not be able to obtain the medications we need. In particular, I object to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

I ask that you seriously reconsider any intention to limit availability and right to obtain these compounds that aid people's health. If such legislation were to pass, even its proponents would find its often critical help missing when they most needed it.

Sincerely,

98N-1265
